

STOP™ Safety Training Observation Programme Overview

STOP™ is a member of the DuPont portfolio of workplace safety training offerings now available from Coastal. The award-winning **STOP** series provides a path to workplace safety excellence by making safe behaviour and workplace conditions part of the work culture, thus preventing injuries and incidents. It is the most popular and successful workplace safety training on the global market today now available from Coastal.

STOP™ for Supervision
Advanced STOP™
STOP™ for Each Other
STOP™ for Ergonomics
STOP™ Implementation Assistance Workshop
STOP™ Implementation Resource
STOP™ Introduction Workshop
STOP™ Assessment Service
STOP™ DataPro™

STOP™ programmes use a combination of methods to give people the information, skills and willingness to work more safely, maximise their learning and apply what they learn to the real world. The programmes feature a three-part approach:

- **Individual self-study.** Workbooks are used to introduce basic concepts and begin safety skill development.
- **Field or application activities.** **STOP™** programme participants practice what they have learned in their own work areas.
- **Group meetings.** After viewing a video, participants discuss what they have learned and consider how it can be applied.

STOP™ Programmes Now Available:

STOP™ for Supervision

A comprehensive, behaviour-based training programme, **STOP™** for Supervision establishes the framework for the entire **STOP™** series. It teaches managers, supervisors and team leaders how to observe people as they work. By talking with people to acknowledge safe acts and correct unsafe acts, workers are encouraged to follow safe work practices.

Advanced STOP™

Builds upon the skills taught in **STOP™** for Supervision and develops the advanced skills needed to make safety audits more meaningful and effective.

STOP™ for Each Other

Focuses on peer-to-peer safety, teaching participants to interact with their co-workers, incorporate safety in their everyday activities and make safety second nature.

STOP™ for Ergonomics

Builds on the principles and skills introduced in the STOP™ series and applies them to ergonomics, an essential component of workplace safety.

STOP™ Implementation Assistance Workshop

A customised, on-site workshop conducted by DuPont and Coastal STOP™ experts that helps build a strong foundation for the STOP™ programme and increase involvement across your organisation.

STOP™ Implementation Resource

This 1 1/2-day workshop provides expert assistance and advice on-site to objectively assess the implementation of any of the following STOP™ programmes: STOP™ for Supervision, STOP™ for Each Other, Advanced STOP™ and STOP™ for Ergonomics.

STOP™ Introduction Workshop

Introduces STOP™ concepts and principles and shows how it can help your company reduce injuries, incidents and associated costs.

STOP™ Implementation Assessment

Reviews STOP™ implementation at your site to assess the success of the implementation, identify gaps and recommend next steps for improvement in your safety audit programme.
