

## Assessment builder for diagnosing training needs

### Assess

- Determine the skill level of employees or students
- Create assessments for “Pay for Skills” apprenticeship programs and qualified labor pools
- Use more than 10,000 questions cross referenced to Coastal Skills Training courses
- Students may review answers via the self-check before submitting for scoring

### Evaluate

- Tailor question banks to individuals
- Run detailed reports including: test completion, scores and missed questions
- Track the mastery of subject areas starting with basic skills up through specialized areas
- Issue certificates

### Deliver

- Establish efficient training programs
- Focus on each trainee’s development needs
- Utilize current questions from Coastal’s 200+ course multi-craft curriculum
- Eliminate wasted time in the classroom

A more efficient training program is a solid foundation to more effective performance in the workforce. “We know we need training, but where do we start?” The answer is through skills assessment. With the PinPoint® Assessment Builder, evaluate improvement and eventual mastery of subject matter. Detailed reports are quickly delivered by PC.
